

**Associate of Science Degree - Rogue Community College
Articulated with the Department of Health & Physical Education
Southern Oregon University**

Origination: AY 2012-13 (effective until revised or terminated)

It is agreed that students transferring from Rogue Community College (RCC) to Southern Oregon University's (SOU) Bachelor of Arts or Science degree in Health and Physical Education will be given full credit for all elected courses listed on the attached schedule. Students following this program of study will have met SOU's lower-division general education requirements, will be assured junior standing within the academic major, and will be eligible for admission to the Department of Health, Physical Education, and Leadership. This agreement is based on the evaluation of the rigor and content of the general education and technical courses at both RCC and SOU and is subject to a yearly re-evaluation by both schools for continuance. This version of the agreement shall remain in effect until revised or terminated by RCC or SOU.

Baccalaureate students must complete a minimum of 60 credits of upper division work before a degree will be awarded and meet all the requirements of SOU prior to graduation. Upper division is defined as 300- and 400-level classes at a bachelor's degree-granting institution.

Transfer students may guarantee their catalog of graduation by obtaining written approval from their SOU major department. The agreed upon catalog will be the one a student uses when he/she declares the AS degree major at RCC. Students must enroll at SOU within two years of this approval.

Associate of Science - Rogue Community College

Articulated with the Health/Physical Education Program at Southern Oregon University

Origination Fall 2012 - Remains in effect until revised or terminated

About the Program

The Associate of Science (Health/PE) has been developed with the cooperation and support of Southern Oregon University (SOU). The degree is fully articulated with SOU's Health and Physical Education program and allows students to transfer directly as juniors and to become admitted into the Department of Health, Physical Education, and Leadership at Southern Oregon University with no loss of credits to pursue a bachelor's degree. The program offers an excellent balance of Health, PE, and general education courses that support advanced study in the field of Health and Physical Education.

Students should contact the SOU Department of Health and PE early in the first year of their AS program to be advised about additional requirements and procedures for admission to the program. Students should be aware that if they transfer before completing this degree, their courses will be evaluated individually toward the general education requirements currently in effect at SOU.

Entry Requirements

Students may be required to take college placement test to determine skill level and readiness indicated by test scores. As part of their training program, students must begin with the courses within their skill levels as determined by placement test scores. In addition, students may also be required to enroll in classes that would increase their employability and success.

Advanced Standing

Coursework from accredited colleges and universities will be accepted in accordance with college policies and the Health/PE department head's approval. In order to ensure coursework is current, program courses over 10 years old must be reviewed and approved by the appropriate department head before being accepted toward course requirements.

Graduation Requirements for Associate Degree

Students must complete a minimum of 90 term credits of lower division collegiate courses with a minimum grade point of 2.0 and a grade of "C" or better in Writing 121, Writing 122, and the Speech class chosen to meet the Oral Communication requirement.

Other Requirements

Students who have graduated from high school or completed a high school equivalency program in 1997 or after must have the following requirement for admission to a four-year Oregon state college or university: 1) Two years of the same high school-level language, or 2) two terms of college-level language with a grade of "C" or better (may be first-year language which can be used as elective credits). Note: If students plan to complete a Bachelor of Arts (BA) degree at a four-year school, they must have a proficiency in a foreign language regardless of when they graduated from high school or equivalency program.
